**DETAILED ACTION**

***Specification***

The status of the continuing cases should be updated as appropriate.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Phelps et al (US5429137) which teaches that unit phase lag may incorporate into average velocity measurement (see abstract) and the magnitude of the first lag autocorrelation incorporates into the determination of variance and turbulence of the flow per col. 4 lines 15 – 22 as exemplary. The results are stored in digital scan converter memory for display.
